PROFILE

Software Engineer with a degree in Internet Technologies and hands-on experience developing backend and full-stack web applications. Experienced with PHP, Laravel, Angular, JavaScript, TypeScript, PostgreSQL and MySQL, with a strong focus on REST API development, database-driven applications, authentication and authorization. Completed a software development internship focused on a cybersecurity-related Dynamic Risk Management system, working with Laravel, PostgreSQL, REST APIs, ORM, migrations and test-driven development. Interested in backend and full-stack Software Engineering roles.

EDUCATION

ICT College of Vocational Studies

Internet Technologies — Belgrade, Serbia

2020 – 2026

EXPERIENCE

Software Developer Intern

Red Alert Labs — Belgrade, Serbia

Nov 2025 – Dec 2025

- Developed a server-side component in **PHP and Laravel** for a cybersecurity-related **Dynamic Risk Management system**.
 - Worked with a modular architecture consisting of **10 API modules and approximately 25 REST endpoints**.
 - Implemented functionality for managing **risks, threats, controls and metrics** according to a detailed technical specification.
 - Worked with **PostgreSQL, ORM and database migrations** to implement and maintain application data models.
 - Followed a **Test-Driven Development (TDD)** approach, including data validation and automated test coverage.
 - Contributed to API development and integration in an **Agile** development environment.
 - Worked in an **Agile environment** using GitHub and collaborated with the development team throughout the project.
-

PROJECTS

Smart Blog

Angular · Laravel · MySQL · REST API

- Developed a full-stack scientific blogging platform using Angular and Laravel.
- Built a REST API with authentication and authorization using Laravel Sanctum.

- Implemented CRUD functionality for posts and categories, including an administration panel.
- Developed nested comments, replies and reactions for posts and comments.
- Implemented role-based authorization and activity logging.

Ambrosia Shop

Laravel · Bootstrap · MySQL · JavaScript

- Developed a full-stack e-commerce application for browsing and purchasing fruit and vegetables.
 - Implemented product CRUD operations and server-side validation.
 - Developed shopping cart functionality and AJAX-based interactions.
 - Created an administration dashboard for managing products and application data.
 - Designed a responsive user interface using Bootstrap.
-

SKILLS

Programming Languages: PHP, C#, JavaScript, TypeScript, HTML5, CSS3

Frameworks & Technologies: Laravel, Angular, ASP.NET, Bootstrap, Tailwind CSS, REST APIs

Databases: PostgreSQL, MySQL

Development: Object-Oriented Programming, REST API Development, CRUD, Authentication & Authorization, ORM, Database Migrations, Data Validation, TDD, Automated Testing, Database Design

Tools & Practices: Git, GitHub, VS Code, PhpStorm, Visual Studio, Linux, DBeaver, Agile

LANGUAGES

Serbian: Native

English: Advanced
